## PROFESSIONAL SUMMARY

Pursuing challenging assignments in full stack and back-end development roles, utilizing proficiency in Java to drive impactful solutions in a collaborative and dynamic work environment.

## WORK EXPERIENCE

**Software Engineer – General Electric, Hyderabad, India (Aug 2021 – Mar 2025)**

**Project: SIM Deployment(B2B)**

- Led the creation of user-friendly interfaces using React and Java, improving user engagement by 20% with strong concepts of HTML and CSS.
- Integrated APIs for optimized data communication, enhancing data transfer times by 15%.
- Managed data with MongoDB and MySQL using stored procedures, achieving 30% faster data retrieval.
- Hands-On experience in state management of components with Redux and React Context API and utilization of frameworks like Tailwind CSS and Ant Design in projects.
- Enhanced UX with web-hooks for instant notifications, increasing user engagement by 40%.
- Skilled in developing RESTful APIs and server-side logic using SpringBoot and Microservices.
- Utilized Kafka for high throughput, real time data feeds from different IoT systems to the backend.
- Integrated with the CI/CD pipeline to ensure frequent, automated testing and delivery of new features.

## **System Engineer – Infosys Ltd, Hyderabad, India (Oct 2018 – Jul 2021)**

### **Projects: Westpac Live, MEDB, Compass(Fintech)**

- Refined fraud detection logic and backend formulas for accurate results.
- Integrated CRUD operations into backend and connected them to frontend interfaces.
- Led systematic code migration from C++ to Java.
- Implemented backend features using Java, Spring Boot and Microservices, emphasizing clean architecture and compliance with industry standards.
- Developed reusable Selenium scripts using BDD/TDD, improving test efficiency by 25%.
- Collaborated with business analysts and stakeholders for optimized solutions.

## **PERSONAL PROJECTS**

### **Capstone Project**

- Built a backend system for modern frontend integration using Mongoose and MongoDB.
- Implemented CRUD with filtering, pagination, sorting, and centralized error handling.
- Added user authentication, authorization, and WebSocket integration.

Tech Stack: MongoDB, Mongoose, JavaScript

### **IMDB (Online Movie Booking) Web App**

- Developed a booking site using fetch API with watchlist/favorites features.
- Used React hooks and context APIs for clean code and debugging.

Tech Stack: JavaScript, React, Tailwind CSS

### **AI Agent**

- Created an AI Agent using Open AI's API.
- Node.js backend enabling real time conversational AI features

Tech Stack: Node.js, Open AI

## **CORE COMPETENCIES**

High-Level Design, UI Design, QA & Testing, Agile Methodologies, Team Collaboration, Project Management, Product Development, Code Optimization, Performance Tuning

## TECHNICAL SKILLS

**Languages:** HTML, CSS, JavaScript, React, C, C++, Java, Spring Boot

**Databases:** MySQL (Skill Mastery Certification from Scalar.com), MongoDB

**Tools:** Git, GitHub, Postman, Selenium, Tailwind CSS, Mongoose, Swift, Kafka, Jenkins

**Practices:** Agile, Maven, Gradle, TDD, BDD, Microservices, System Design

**IDE:** VS Code, Eclipse

**Other:** DSA (Intermediate/Advanced) Solved 500+ question on Interview Bit /Scalar, OOP, Machine Coding

## ACHIEVEMENTS

- Best Team Award – Infosys Limited (2019)
- Nominated for Best Utilities (2020) for innovative tools

## EDUCATION

**Bachelor of Engineering (ECE) – 2018**

Medi-Caps Institute of Technology and Management, Indore
