Profile

I have 7+ years of IT experience, with 4+ years as a ServiceNow developer being the most significant. I started as a technical support engineer resolving major incident tickets, and our main CRM tool was ServiceNow, so I made an effort to learn the platform from online resources, and then I received internal transfer to the ServiceNow team, where I worked on implementation and support projects.

Expertise in platform concepts

- ITSM - Incident, Major incident, knowledge, problem, and change management
- Catalog items, Workflow, and flow designer
- Integration - Data Source integrations, Rest Based integrations (Outbound), Inbound action
- Agile development - Sprint based.
- Platform fundamentals - client scripts and its types, UI policy, Business rule and its types, Script include (Client callable and server callable), Notifications and its types, UI Actions (Server side, client side and both), Data policy, ACLs (Access control List) and its types,

PROFESSIONAL EXPERIENCE :

Service Now Consultant

LTI Mindtree

09/2024 – Till Date

Bengaluru, India

1) Project: Service Now – Lufthansa Airlines

Roles & Responsibilities:

- Created and modified Client Scripts, Business Rules, ACLs, Script Includes, and UI Actions based on business requirements.
- Configured Events and Email Notifications to support automated communication and business processes.
- Created Service Catalog items and designed workflows to streamline request fulfillment processes.
- Worked on production bug fixes, enhancements, and continuous improvement activities.
- Configured request forms and developed automated workflows using Flow Designer.

- Created and configured Order Guides and Record Producers based on business requirements.
- Resolved production defects and performed troubleshooting to ensure platform stability.
- Participated in ServiceNow upgrade activities and supported post-upgrade validation.
- Worked with Transform Maps and data loading processes to migrate and maintain data in ServiceNow.
- Developed and executed Automated Test Framework (ATF) test cases to validate ServiceNow functionality.
- Performed Health Scan remediation and implemented recommended fixes to improve platform health.
- Configured and supported scheduled data imports to automate data synchronization and loading processes.

Service Now Consultant

Nexii Labs

09/2022 – 09/2024

Bengaluru, India

Client #1: Dell Technologies

Dell was using HPSM for their IT ticketing and they wanted to switch over to service now. I have been involved from the start of the ITSM implementation and initially I was involved in incident, Major incident, Problem track and, involved in change management and knowledge management track later.

Incident and Major incident: Configured the Assignment rules, SLAs based on the priority, Activated the Major incident plugin and setup their trigger rules, Customized the Lifecycle and configured the flow.

Change management: Added custom risk assessment questionnaires', Risk conditions, configured change approval policies, Conflict management etc.

Knowledge management: Added the knowledge articles to the system, created knowledge bases, Customized the workflow for approvals and defined the user criteria.

Integrations:

- Exposed the endpoints to be consumed by Big-Panda monitoring tool to create an incident in out ServiceNow instance.
- Integrated our ServiceNow to partner ServiceNow instance – Bidirectional to exchange incidents between the system.
- **Inbound** – Configured the custom API using the scripted REST API and exposed the POST/PATCH/GET endpoints to be continued.
- **Outbound** – Consumed the API and tested using REST message with the connection once connection established then have setup a trigger condition from an async business rule.
- **POSTMAN** – Before exposing/consuming the APIs used third party tool to test the payload connections.

Agile: Used Jira to log the stories

Client #2: Nissan

- Clients are using service now for ITSM alongside they wanted a custom application in global scope to support their custom labor rates flow.
- Here, we built a record producer, catalog items, custom table and flow to support their labor rate charges.
- Got good exposure to the platform basics and involved in an end-to-end implementation.

Agile: Uses ServiceNow to log stories, Enhancements, and defects
