## SUMMARY

---

Experienced software engineer with **7 years of expertise** in event-driven, object-oriented, multi-threaded, real-time, cloud-based, SaaS, API architecture. Proficient in scalable, high-performance, microservices-based distributed software design & development, and implementation.

## SKILLS

---

**Problem Solving:** Data Structures, Algorithms, Microservices, Object Oriented Design.

**Language:** Java, SQL, JavaScript, HTML, CSS, JQuery.

**Frameworks:** Spring, Spring Boot, Dropwizard, Spring Cloud, Spring Security, Hibernate.

**Database:** Oracle, MySQL, Redis. (Basic Knowledge of MongoDB, Elasticsearch)

**Tools:** Kafka, Spark, OCI, AWS, Docker, Kubernetes, Junit, Flyway, Git, BitBucket.

## Professional Experience

---

**Oracle** - Senior Member Of Technical Staff (November 2022 - Present)

Project: Access Governance Cloud

- Implemented libraries to be used by many other services such as redis global cache, unique ID Generation, generic query pattern, flyway schema migration and kafka event library.
- Planned and developed generic webhook client to publish change events.
- Implemented redis caching layer for HTTP APIs resulting in **70% higher throughput**.
- Planned and Implemented a data pipeline that ingests large volumes of data daily using kafka, spark and OCI services that provides the platform for the rest of the micro services.
- Developed microservices for various reports, data plane API using openAPI specification.
- Optimized database queries, resulting in a **50% reduction** in data retrieval times.

**Nagarro Software** - Senior Engineer (May 2021 - November 2022)

Project: Generic Federation platform

- Planned and implemented Aerospike caching layer resulting in high availability, low latency, and high performance of **Flipkart's core B2C service**.
- Planned and implemented Debug functionality and chrome extension, **Reducing overall debugging efforts by 80%**.
- Added significant revenue impacting features, such as new widgets onboarding on Flipkart's homepage, snippets, aerospike cache integration and on-call support for production issues.
- Integrated NewRelic for observability and real time visibility of service level performance metrics.

**Algoworks Technologies** - Software Engineer - (April 2019 - May 2021)

Projects: Demica | SymTrain | Mecan

- Developed and maintained systems for transaction processing such as handling debits, credits, transfers, payments etc.
- Worked on ingesting, storing, and transforming financial data for analysis.

- Integrated Stripe payment gateway for payment processing.
- Planned and Implemented Spring batch job to periodically publish training data to AWS S3.
- Automated schema migration using Liquibase integration in CI/CD pipeline.

## **Infogain India pvt. ltd.** - Software Engineer (October 2017 - April 2019)

Projects: DataBloks | FedEx

- **Led a team of 5 developers** on a startup Inventory Management Product from scratch, collaborating directly with clients for planning, design and development.
- Participated in Agile development sprints, consistently delivering features on time and within budget.
- Optimization of billing and discount features of FedEx enterprise products.

## **EDUCATION**

---

### **Bachelor of Technology in Computer Science & Engineering**

Ajay Kumar Garg Engineering College, Ghaziabad (2014 - 2017)

Percentage: **72.5%**

### **Diploma in Computer Science & Engineering**

Govt. Polytechnic College, Mahoba (2011 - 2014)

Percentage: **78%**

### **High School : Science**

Aadarsh Vidya Mandir, Nagar Bazar, Basti (2010 - 2011)

Percentage: **76%**
