
OVERVIEW

Senior Manager with 13+ years of experience in Information Security, Endpoint Security, and GRC. Proven track record of strengthening security posture, managing risk, and driving operational efficiency. Leverages AI-driven insights and automation in daily operations to enhance decision-making, streamline processes, and deliver measurable business outcomes. Thrives in fast-paced environments with a focus on continuous improvement and innovation.

PROFESSIONAL EXPERIENCE

Senior Manager in Yash Technologies, Bangalore – (Dec 2025 – Till Date)

Key Deliverables:

- Governed end-to-end cybersecurity program delivery, aligning with organizational objectives, risk management, and compliance frameworks.
- Leveraged AI-driven tools (Microsoft Copilot) to optimize security operations, enhance productivity, and support data-driven decision-making.
- Ensured delivery excellence by aligning outcomes with KPIs, SLAs, and Statements of Work (SOWs).
- Led transition planning and execution for cybersecurity initiatives, ensuring seamless delivery and minimal operational disruption.
- Partnered with C-suite and senior leadership to drive alignment on security strategy, risk posture, and business goals.
- Translated complex cybersecurity, risk, and compliance concepts into clear, business-focused insights for stakeholders.
- Directed resource management, including hiring, workforce planning, and upskilling, leading a team of 48 resources to deliver high performance.
- Performed security control assessments, gap analysis, and risk evaluations, implementing mitigation strategies aligned with ISO 27001, NIST, and industry best practices.
- Managed vendor relationships, including contract renewals, cost optimization, and capacity planning, improving service delivery efficiency.
- Demonstrated strong communication and stakeholder management skills, effectively engaging both technical and non-technical audiences.
- Collaborated with global, cross-functional teams to drive alignment, innovation, and successful program execution.
- Utilized advanced MS Office (Excel, PowerPoint, Word) and reporting tools to develop executive dashboards, presentations, and data-driven insights.

Security Delivery Manager in Accenture, Bangalore – (May 2024 – Aug 2025)

Key Deliverables:

- Defined program charters, milestones, and execution roadmaps for enterprise Cybersecurity Transformation initiatives, ensuring alignment with Program Governance standards.
- Led Operating Committee and Steering Committee governance forums, driving strategic alignment, risk review, and Go/No-Go decision-making.
- Managed stakeholder engagement, cost optimization, and budget planning, ensuring effective resource allocation and financial governance.
- Spearheaded Tanium platform migration from On-Premises to vendor-managed SaaS, collaborating with Tech Ops to ensure seamless transition and minimal downtime.
- Executed Proof of Concepts (POCs), business demonstrations, and end-to-end implementation, enabling adoption of security solutions and technologies.
- Conducted comprehensive Cyber Risk Assessments across technical, operational, and compliance domains, identifying gaps, documenting risks, and driving remediation actions.
- Applied expertise in Cybersecurity Frameworks and Standards including NIST, COBIT, SOC 2, and regulatory compliance requirements.
- Developed and progressed RFCs (Request for Change) for integrations across ISD, CMDB, SIEM, and SOAR platforms, enhancing security operations and automation.
- Strengthened SaaS Security Governance by driving SSPM (SaaS Security Posture Management) adoption and managing penetration testing outcomes.
- Secured enterprise applications through SSO (Single Sign-On) integration, access validation, and exception management, improving identity and access controls.
- Demonstrated strong problem-solving, analytical thinking, and attention to detail to ensure high-quality execution and continuous improvement.

Service delivery manager in Tata Consultancy Service, Bangalore – (Sept 2022 – May 2024)

Key Deliverables:

- Led a cross-functional Cybersecurity Operations team of 44 associates (including 5 Team Leads) across global onshore/offshore delivery models, ensuring high availability and operational excellence.
- Managed enterprise security tools including CyberArk (PAM), Forescout (Network Access Control), Zscaler (Zero Trust), Qualys (Vulnerability Management), and Cisco Email Security, strengthening overall security posture.
- Drove Program Governance and Service Delivery Excellence by leading QBR (Quarterly Business Review), PMR, MSR, WSR, daily governance cadences, and audit readiness initiatives.
- Strengthened Governance, Risk, and Compliance (GRC) by aligning with regulatory requirements, implementing NIST framework controls, conducting CSS reviews, and delivering compliance reporting.
- Directed Security Incident Management (SIEM-driven detection, triage, and response) for high-priority and critical threats, acting as an escalation point and ensuring timely remediation.
- Demonstrated strong Stakeholder Management, influencing outcomes and driving alignment with Director and C-Suite leadership through strategic communication and negotiation.
- Led Endpoint Security and Antivirus Operations using McAfee ePO, Microsoft Defender ATP (MDE), including IOC blocking, signature updates, threat analysis, and compliance reporting.
- Managed Identity and Access Management (IAM) operations through Azure Active Directory (AAD), including provisioning, access governance, and SSO integration.
- Directed security tool upgrades and platform enhancements, ensuring scalability, performance optimization, and risk reduction.
- Supported Windows Server Security Operations, delivering advanced reporting and analytics using ePO, SCCM, and Microsoft Defender for Endpoint (MDE).
- Applied ITIL best practices through ServiceNow (Incident, Problem, Change Management) to improve service delivery, reduce downtime, and ensure SLA compliance.

Domain Specialist in Philips India LTD., Bangalore - (Oct 2018 – Aug 2022)

Key Deliverables:

- Planned, documented, and executed system upgrades and release management within the Digital Workplace environment, ensuring smooth production deployment and minimal business disruption.
- Participated in Agile daily scrums with vendors and internal teams, tracking progress, resolving blockers, and ensuring SLA compliance.
- Managed Software Lifecycle Management (SLM), including asset tracking, compliance reporting, and vendor coordination.
- Delivered end-user and Service Desk training, and led global communication strategies for policy updates, system enhancements, and incident resolutions.
- Led SaaS application onboarding (e.g., Miro) including security assessments, risk evaluation, SSO enablement, ServiceNow integration, and user provisioning.
- Strengthened Governance, Risk, and Compliance (GRC) by applying regulatory frameworks such as SOC 2, HIPAA, and GDPR.
- Defined security requirements, executed system upgrades, and developed customized technical solutions aligned with business and compliance objectives.
- Built dashboards and custom reports using Trellix/McAfee ePO and monitored/responded to Data Loss Prevention (DLP) events and security alerts.
- Utilized ServiceNow (ITIL framework) for Incident, Problem, and Change Management, improving service efficiency and governance.
- Managed 1E Software Distribution Platform, enabling efficient and scalable global software deployment and patch management.

Senior Project Engineer in Wipro Technologies – (January 2013 – October 2018)

Key Deliverables: McAfee/Trellix EPO

- Deployed and monitored endpoint security via ePO, ensuring compliance across systems.
- Generated compliance reports and presented system update status to management.
- Implemented DLP via ePO, from test phase to full production rollout.
- Configured and managed mail/word-based rules and security policies, including modifications.
- Executed full disk encryption for laptops and desktops through ePO.
- Led ePO migration (5.0 to 5.3.0) and coordinated with vendors on Azure Site Recovery (ASR) for DR.
- Managed centralized patching, antivirus updates, and remote workstation security.
- Provided security support, incident resolution, and requirements analysis.
- Handled ITIL-based incident management via SM7 ticketing tool.
- Delivered 24x7 support for two critical security projects.

EUC engineer and Windows Administrator

- Administered Windows Server 2008 R2/2012/2012R2 across physical, blade, and virtual environments.
- Managed VMware vCenter 5.x, including VM provisioning, cloning, and template management.
- Oversaw AD identity management, DirSync to Office 365, license assignments, and access control.
- Installed, configured, and troubleshooted operating systems, desktops, laptops, and applications.
- Provided application support for Finacle and managed software installation/troubleshooting.

- Configured and supported MS Outlook (20xx), McAfee AV, and encryption tools.
- Utilized HP Service Manager 7 & 9 for incident and request management.
- Coordinated with vendors and handled escalations to maintain service continuity.
