KEY PROJECTS

CUSTOMERS:

Hrvatski Telekom Croatia, OTE Greece, T-Mobile Czech Republic, Slovak Telecom

ROLE:

Solutions architect & technical consultant

PLATFORM:

Sprinklr CCaaS

TEAM SIZE:

5

BUSINESS OBJECTIVE:

As part of Deutsche Telekom's OneCC transformation program, Sprinklr CCaaS was selected as the strategic target contact center platform for Deutsche Telekom and its National Companies across Europe. TSI (Deutsche Telekom's IT organization) was entrusted with leading the migration initiative in partnership with Sprinklr, driving the transformation of voice and digital customer engagement channels to the new cloud-based contact center platform.

SOLUTIONS DELIVERED:

- Provided consulting and technical advisory services to customers**, helping them resolve product-related issues, address complex requirements, and maximize the value of their contact center investments.
- Designed and implemented custom solutions** to address business requirements that could not be fulfilled

through standard out-of-the-box product capabilities, ensuring alignment with operational and customer experience objectives.

3. **Led the migration of B2B and B2C voice and digital contact center services from Genesys Engage to Sprinklr CCaaS**, covering solution assessment, migration planning, architecture design, implementation, and transition support.
4. **Designed and delivered integrations between Sprinklr voice and digital channels and enterprise systems**, including CRM platforms, TIBCO middleware, and other third-party applications, enabling seamless data exchange and end-to-end customer journey orchestration.
5. **Acted as the primary liaison with Sprinklr product teams**, raising product defects, driving issue prioritization, coordinating troubleshooting activities, and ensuring timely resolution of critical bugs and platform issues.
6. **Collaborated with business stakeholders, technology teams, and vendor partners** to ensure successful solution delivery, platform adoption, and continuous improvement of customer service operations.

CUSTOMER:

GE RENEWABLE ENERGY (USA)

ROLE:

Solution architect and senior manager

PLATFORM:

Genesys Cloud CX

TEAM SIZE:

3

BUSINESS OBJECTIVE:

Migration of GE's internal technician support IVRs from Avaya to Genesys Cloud CX

SOLUTION DELIVERED:

1. **Led the migration of GE Renewable Energy's internal technician IVR platform from Avaya to Genesys Cloud**, designing and implementing customer journeys using Genesys Architect while ensuring seamless transition and minimal disruption to business operations.

2. **Designed and implemented integration between GE Renewable Energy's Ping Identity SSO platform and Genesys Cloud CX**, enabling secure authentication, streamlined user access, and compliance with enterprise security standards.
3. **Successfully migrated the Europe and US Internal Service Desk operations to Genesys Cloud CX**, delivering a modern cloud-based contact center solution that improved scalability, operational efficiency, and user experience across multiple regions.

CUSTOMER:

TELEFONICA GERMANY

ROLE:

Solution architect and operations lead

PLATFORM:

Genesys Engage & Sprinklr CCaaS

TEAM SIZE:

6

BUSINESS OBJECTIVE:

1. Operations of existing Genesys engage environment for customer service.
2. Migration of voice & non-voice services and contact center to Sprinklr CCaaS

SOLUTION DELIVERED:

1. **Managed key stakeholder and vendor relationships**, including coordination with Infinit.cx, ensuring successful delivery of contact center initiatives, issue resolution, and alignment with business objectives.
2. **Led the operations and maintenance of the Genesys contact center infrastructure**, ensuring high system availability, stability, performance, and adherence to operational standards.
3. **Maintained and improved operational SLAs and KPIs**, driving the operations team to consistently meet service targets and deliver a high-quality customer experience.
4. **Reduced operational costs by identifying recurring issues and implementing strategic enhancements and platform upgrades**, minimizing incident volumes and improving overall system efficiency.
5. **Designed solution architectures for new service requests and business enhancements**, supporting product launches, new customer offerings, and

evolving business requirements through scalable contact center solutions.

6. **Conducted technology assessments and developed the solution architecture for Sprinklr migration**, including integration with Telefónica's existing on-premises contact center ecosystem and enterprise applications.
7. **Served as a member of the Architecture Governance Board**, evaluating the impact of changes and enhancements to adjunct systems on contact center solutions, ensuring architectural integrity, risk mitigation, and compliance with enterprise standards

CUSTOMER:

Three Mobiles (UK)

ROLE:

Solution architect and designer

PLATFORM:

Genesys Pure Engage Cloud

TEAM SIZE:

5

BUSINESS OBJECTIVE:

Migration of voice & non-voice services and contact center to Genesys Pure Engage Cloud

SOLUTION DELIVERED:

1. **Led the solution architecture for migration of voice IVRs from an on-premises Genesys environment to Genesys PureEngage Cloud**, defining the target-state architecture for voice routing, IVR applications, telephony infrastructure, and integrations with enterprise applications and backend systems.
2. **Served as a member of the Architecture Governance Board**, evaluating the impact of enhancements and changes to adjunct systems on contact center solutions, ensuring architectural compliance, scalability, stability, and alignment with enterprise standards.
3. **Designed and delivered new IVR service solutions**, defining integration architectures with middleware and backend platforms to enable seamless customer journeys, improved self-service capabilities, and efficient data exchange across systems.

CUSTOMER: Rogers Canada

ROLE: Solution consultant

PLATFORM: Genesys Pure Engage

TEAM SIZE: 2

BUSINESS OBJECTIVE: Enhancement of existing IVR applications.

SOLUTION DELIVERED:

1. **Mentored and led a team of new developers in the IPCC domain**, enabling them to quickly gain proficiency in Genesys platforms, system configurations, and domain-specific processes, thereby accelerating their onboarding and productivity. Reviewed estimations and plan submitted by the developers before sending it to the customer. Made sure that enough contingency is available while also not exceeding the budget/timelines
2. **Reviewed project estimates and implementation plans prepared by developers** before customer submission, ensuring realistic effort assessments, adequate risk contingency, and alignment with budget and timeline commitments.
3. **Designed solutions for new IVR services**, defining end-to-end architecture and integration approaches with middleware and backend systems to support business requirements while maintaining scalability and reliability.

CUSTOMERS: Vodafone Australia, Base/Telenet Belgium, Vodafone UK, EDF Energy UK

ROLE: Solution consultant

PLATFORM: Genesys Pure Engage & Avaya

TEAM SIZE: 4-7

BUSINESS OBJECTIVE: Enhancement of existing IVR applications.

SOLUTION DELIVERED:

1. **Served as a Solution Designer and Subject Matter Expert (SME) for Genesys and Avaya contact center platforms**, providing architecture guidance, solution design, and technical leadership for customer engagement solutions.
2. **Designed and implemented voice and digital customer service solutions using Genesys 7.6 and Avaya Experience Portal**, delivering scalable and reliable contact

center capabilities aligned with business requirements.

3. **Developed custom solutions for Base Mobile Belgium**, including the creation of a Turkish language pack and the implementation of automated IVR prompt and call-flow deployment processes using Jenkins-based CI/CD pipelines, significantly improving deployment efficiency and consistency.
4. **Designed and optimized IVR call flows**, ensuring seamless customer journeys and efficient self-service experiences across multiple channels.
5. **Architected and implemented integrations with enterprise systems**, including TIBCO middleware and Salesforce CRM, enabling real-time data exchange and enhanced customer interaction management.
6. **Provided technical consulting and troubleshooting expertise**, supporting solution enhancements, platform upgrades, and the resolution of complex contact center challenges.
