Udemy

TeMIP Admin

HPE

Languages

English, Hindi , Punjabi

Summary

Experienced IT Professional with 12.8+ years in the industry, including 5+ years as a DevOps Engineer. Over 6 years of hands-on experience with Microsoft Azure Cloud, delivering robust, scalable, and secure solutions. Proven expertise in automating infrastructure, orchestrating CI/CD pipelines, and implementing cloud-native architectures. Skilled in Infrastructure as Code (IaC) using Terraform, containerization with Docker, and pipeline automation using Azure DevOps and GitHub Actions. Adept at enhancing system reliability, accelerating deployment cycles, and driving operational efficiency through automation and industry best practices.

Experience

Wipro Limited

May 2022 to Present

Management Consultant

Gurgaon , Haryana

- Leading DevOps and cloud automation initiatives in Telecom OSS and infrastructure management.
- Developed and maintained CI/CD pipelines using Azure DevOps and GitHub Actions to streamline and accelerate deployment workflows.
- Created standardized **YAML-based CI/CD pipeline** templates in Azure DevOps, accelerating deployment onboarding for new projects.
- Designed and implemented automated infrastructure using **Terraform** for deploying Azure resources (VMs, VNETs, App Services, etc.).
- Implemented modular **IaC using Terraform**, improving infrastructure reusability and maintainability.
- Managing **Azure Kubernetes Service (AKS)** clusters for high-availability telecom applications.
- **Monitoring & Logging:** Deployed and managed **Prometheus, Grafana, and Nagios** for observability and monitoring.
- Worked extensively with **Docker and Kubernetes (K8s)** to deploy microservices-based applications.
- **Scripting & Automation:** Developed automation scripts using **Python, Shell Scripting, and PowerShell** to improve operational efficiency.
- Strong leadership experience in **technical project execution, stakeholder communication, and team mentoring**.

Hewlett-Packard Enterprise

April 2019 to April 2022

DevOps and Cloud Engineer

Gurgaon , Haryana

- Migrated on-premise workloads to Azure using Azure Migrate and Terraform, streamlining infrastructure management and helping reduce operational overhead.
- Regularly worked with Docker — building images, writing Dockerfiles, managing registries, and using Docker Hub for multi-container setups.
- Worked on **Azure networking** — including virtual networks, VPN gateways, ExpressRoute, DNS, and load balancers — to ensure secure and scalable cloud connectivity with on-prem environments
- Configured **Network Security Groups (NSGs)** at the subnet and NIC level to enforce tight access controls across Azure virtual machines.
- Integrated static code analysis and testing stages into **CI/CD pipelines using Azure DevOps**.
- Automated resource provisioning using **Terraform**, enabling consistent and repeatable deployments across multiple environments.
- Focused on infrastructure as code practices using Terraform — writing plans, managing changes, and automating cloud infrastructure rollout on Azure.
- Configured **Azure Active Directory (AAD)**, role-based access control (RBAC), and policies for secure and compliant access to cloud resources.

Hewlett-Packard Enterprise, Gurgaon (Third Party)

April 2015 to March 2019

Senior Application Support & System Engineer

Gurgaon , Haryana

- Worked as Shift Lead, managing operations and ensuring seamless application support.
- Regular health checkup and Performance Monitoring of servers.
- Applied OS hardening best practices, including disabling unused services, enforcing strong password policies, and enabling automatic security updates.
- Configured automatic patching and kernel updates to keep Linux servers secure and compliant.
- Collaborated with Primus Global Technologies Pvt. Ltd. (April 2018 – March 2019) and Vega Innovations and Technology Pvt. Ltd. (August 2015 – March 2018) on the same project

**IKYA Human Capital Solutions Pvt Ltd(New Delhi), Client
Side (INDUS TOWERS)**

Sept 2012 to Aug 2015

Sr. Executive-NOC (O&M)]

Gurgaon , Haryana

- Provided national-level NOC network support, ensuring smooth telecom operations and minimal downtime.
- Managed alarm analysis, fault management, and RCA automation to improve network stability.
- Led OSS/EMS integration with vendors (NSN, Ericsson, ZTE, Huawei) for enhanced system performance.
- Conducted UAT and administration of NOC applications, including TeMIP, Helix NetKT, and I-Navigator.
- Generated and analyzed KPI reports, outage reports, and performance analysis reports to optimize operations.
- Provided support for Indus NOC Project for Indus Towers India.

Education

**World Institute of Technology(MDU B.Tech (Electronics & Communication) 2012
Rohtak)**
