-

EMPLOYMENT

CitiCorp India Services Pvt. Ltd.

Business analyst

Mar 2023 – Present

Project: FX Automation

- Core objective is to enhance the CITIFT application for Foreign Exchange (FX) automation
- Key functional areas include **passive FX** flow handling, value date management, FX cut-off processing and dedicated FX repair queues
- Involved in functional requirement analysis and solution design **for FX automation in payment systems**

- Created FRD, epics, and user stories for payment and FX change requests
- **Implemented** automated FX rate sourcing and validation **for cross-border and high-value payments**
- **Improved** Straight Through Processing (STP) **and reduced manual intervention**
- **Performed** payment trace analysis, RCA, and defect triaging
- **Collaborated with** Product, Technology, partner systems and Operations teams **for solution delivery**
- **Supported** UAT and production readiness activities
- Supported internal automation team with functional and configuration expertise
- **Created static data set up** based on the Requirement

Project: CIPS MT191 Implementation

- This project enhances the CITIFT system to efficiently handle incoming MT191 charge message from China's CIPS system
- It focuses on ensuring accurate receipt, parsing and mapping of MT191 transaction fields, followed by matching them with original MT100/103 payments
- Functional Analysis of requirement from Ops & Product Team, Providing walk through for implemented solution to stakeholders
- Provided Analysis for the defect raised into scrum Board and logs analysis if defect require any set up fix and Functional assistant to developers for any defect fix
- Created User stories for the CITIFT changes.
- Involved in scrum ceremonies, retrospective and maintaining scrum board.
- Provided High level walk-through to the stake-holders for the changes before implementation and before Go live
- Led **end-to-end implementation** of MT191 charge message processing
- Enabled **MT191 to MT202 conversion with accounting and compliance checks**
- Ensured **OFAC/sanction screening compliance**
- Handled **duplicate and unmatched transaction scenarios**
- Delivered project with zero escalation

Finastra / Xoriant

Test Engineer

Mar 2020 – Feb 2023

Project: Leading Bank in European Region

- Worked on **SWIFT High Value Payments and ISO 20022 processing** using GPP SP
- Performed **requirement analysis, test design, and execution**
- Worked on **SEPA Direct Debit and Credit Transfer**
- Automated API testing using **SoapUI**
- Managed **defect lifecycle and release validation**
- Supported **STP payment processing systems**
- **Review CRDs** and ensure traceability of all functionalities to be covered by prepared Traceability matrix.
- Handled client defects through trace analysis and optimal solutioning
- Led GUI and functional testing for payment processing modules
- **Support SMEs, business analysts, and developers** with testing-related activities.
- Product: **GPP SP 4.6.15 and 4.6.17**

Project: Leading Bank in APAC Region

- Worked on **GPP Classic payment processing platform**
- Handled **incoming and outgoing SWIFT payments**
- Performed **functional testing, defect triaging, and stakeholder discussions**

- Triage bank defects, analyse test results by examining traces, and supported developers and business analysts. Retested defects and provided solutions to the bank, including setup documentation
- Supported **release cycles and production validation**

Bajaj Finserv (Teamlease)
