- Participated in scrum ceremonies including the Daily Standup, Sprint Planning Meeting, Sprint Review, and Sprint Retrospectives & Led the Scrum calls.
- Developed comprehensive BRD and FSD that enhanced alignment among 10+ onshore clients, fostering clear communication and ensuring project success.
- Developed detailed Business Requirement Documents (BRD) capturing business objectives, stakeholder needs, project scope, and high-level requirements to ensure clear alignment across business teams
- Created comprehensive Functional Requirement Documents (FRD/FSD) translating business requirements into detailed functional specifications, workflows, data mappings, and system behaviors for seamless development and implementation
- Created and managed end-to-end Power BI solutions, delivering 10+ impactful reports and 8+ interactive

dashboards that transformed complex data into actionable insights, empowering stakeholders to make informed decisions

- Crafted and deployed DAX queries and optimized scripts for data analysis, producing insightful reports that inform key business decisions for teams of 50+ stakeholders while enhancing KPI visibility
- Streamlined reporting by automating data pipelines using SQL, SAS, and Dataiku, ensuring seamless Tableau dashboard refresh cycles.

Junior Analyst | Jan 2019 – Oct 2019

Broadridge Financial Solutions Pvt Ltd

- Analyzed financial and operational data to support reporting, reconciliation, and client deliverables within defined timelines.
- Assisted senior analysts in preparing reports, validating datasets, and identifying discrepancies to ensure data accuracy and compliance.
- Collaborated with cross-functional teams to streamline workflows, maintain documentation, and improve process efficiency.

PROJECTS

Telecom Billing & Revenue Assurance System

Worked on a billing and revenue assurance platform to ensure accurate charging, invoicing, and leakage detection across prepaid and postpaid services. Gathered and documented requirements, analyzed billing workflows, and collaborated with stakeholders to improve revenue tracking and minimize discrepancies.

Digital Loan Management System (Finance)

Analyzed and documented requirements for a digital loan processing platform that streamlined loan applications, credit evaluation, and approval workflows. Collaborated with stakeholders to define user journeys, reduce processing time, and improve decision accuracy through data-driven insights.

Personalized Learning Analytics Platform (EdTech)

Worked on a learning analytics system that tracked student performance and provided personalized course recommendations. Gathered requirements, created user stories, and supported the design of dashboards to help educators monitor progress and improve learning outcomes.

FHIR Project (Healthcare)

Led the design and development of a FHIR-based mobile application that enables seamless access and search of patient data from EMR systems, while ensuring alignment with business needs through detailed requirement gathering and SRS documentation. Additionally, built an appointment scheduling application using Agile methodology, allowing users to book online and offline consultations. Provided training to developers and clients on FHIR concepts and application usage, ensuring smooth development, adoption, and usability.

Fraud Detection & Risk Monitoring System (Finance)

Worked on a fraud detection platform to identify suspicious financial transactions using rule-based and data-driven approaches. Gathered and documented business requirements, defined risk indicators, and collaborated with stakeholders to design dashboards that improved fraud visibility and reduced financial losses.

EDUCATION

VISHVESVARAYA TECHNOLOGICAL UNIVERSITY

Master of Business Administration | 2018

KARNATAKA UNIVERSITY

Bachelor of Commerce | 2016
