

YUVARAJ GUJAR

Senior Business Analyst | Banking & Financial Services

Syndicated Lending • Regulatory Reporting • Risk Analytics • FINASTRA Loan IQ

+91-9922456904 | yuvaraj.gujar27@gmail.com | Pune, India

PROFESSIONAL SUMMARY

Senior Business Analyst and Loan IQ Functional Consultant with 17+ years of progressive experience in Corporate Banking, Syndicated Lending, Investment Banking, and Capital Markets. Deep hands-on expertise in FINASTRA Fusion Loan IQ — covering the full loan lifecycle from Deal Setup and Facility Configuration to Drawdowns, Fee Processing, Interest Accrual, and Statutory Regulatory Reporting. Proven delivery record across global tier-1 institutions including ING Bank Netherlands, BNP Paribas, Credit Suisse, and BNY Mellon. Skilled in bridging business and technology through rigorous requirements gathering, end-to-end SDLC delivery, Agile/Scrum execution, and leading cross-functional offshore BA teams. Strong additional background in Market Risk, Liquidity Risk, and Regulatory Reporting (LCR, NSFR, COREP, FINREP, SiFi3).

FINASTRA LOAN IQ — FUNCTIONAL EXPERTISE

Core Loan IQ Modules & Functional Knowledge

- Deal Setup & Configuration — Bilateral and Syndicated deal structures, multi-lender arrangements, agent and non-agent roles, deal amendment workflows, and deal-level accounting setup.
- Facility Management — Revolving Credit Facilities (RCF), Term Loans (TL/TLA/TLB), Sub-limits, Swinglines, Letter of Credit (LC) facilities, facility fee configuration, and maturity management.
- Outstandings & Drawdowns — Loan booking, drawdown processing, repayment scheduling, rollover management, prepayments, and maturity extensions across multi-currency portfolios.
- Covers & Risk Participations — Funded and unfunded risk participation setup, cover management for syndicated and bilateral exposure, and counterparty risk tracking.
- Fee Processing — Commitment fees, agency fees, upfront fees, utilisation fees, waiver fees, amendment fees — accrual and settlement workflows in Loan IQ.
- Interest Accrual & Rate Setting — SOFR, EURIBOR, SONIA, LIBOR transition handling, base rate and spread configuration, interest period management, non-accrual processing, and rate reset workflows.
- Loan Amendments & Restructuring — Covenant waiver processing, facility extension, repricing, lender transfers, and syndication changes.
- Loan IQ Regulatory & Statutory Reporting — LCR, NSFR, SiFi3, COREP, FINREP reporting configured and validated via GFRS (Global Financial Reporting System) integration with Loan IQ data.
- SWIFT & Payments Integration — MT103, MT202 payment message processing, agent notification handling, nostro reconciliation, and settlement workflows.
- Data Architecture & SQL — Deep understanding of Loan IQ database schema, Oracle-SQL based GFRS architecture, data flow from Loan IQ to downstream reporting systems.
- Testing & Release Management — BRD, FRD, FSD authoring; SIT, UAT, and regression testing per Loan IQ release cycle; defect triage and stakeholder sign-off facilitation.
- Loan IQ Upgrades & Releases — Major release and patch release delivery, regression testing across functional modules, and change impact assessment.

CORE COMPETENCIES

Loan IQ Functional	Syndicated Lending	Deal & Facility Setup	Drawdown & Accrual	Fee Processing, Pricing/Rollover
Regulatory Reporting	LCR / NSFR / COREP	FINREP / SiFi3	Market Risk (VaR)	Data Management
BRD / FRD / FSD	UAT & SIT Testing	Agile / Scrum	SQL / Oracle	Stakeholder Mgmt.
SWIFT & Payments	Covers & Participations	GFRS Architecture	Control-M / JIRA	Team Leadership

PROFESSIONAL EXPERIENCE

Cognizant Technologies Private. Ltd.

Feb 2020 – Present

Client: ING Bank, Netherlands

Designation: Service Delivery Manager | **Role:** Senior Business Analyst — Loan IQ & Regulatory Reporting

FINASTRA Fusion Loan IQ — Commercial Lending BA

- Serve as the primary Loan IQ functional subject matter expert (SME) for ING Bank's Commercial Lending tribe, covering end-to-end business analysis across the Fusion Loan IQ platform for syndicated and bilateral lending portfolios.
- **Deal Setup & Facility Configuration:** Analyse and document requirements for deal creation, multi-lender syndication structures, facility types (RCF, Term Loans, Swinglines, LCs), sub-limit configurations, and lender share allocations within Loan IQ — ensuring accurate reflection of credit agreement terms.
- **Outstandings & Drawdown Management:** Define and validate business requirements for loan drawdown processing, repayment schedules, rollovers, prepayments, and maturity extensions across multi-currency, multi-branch portfolios on Loan IQ.
- **Covers & Risk Participations:** Document and test funded and unfunded risk participation structures, cover setup for syndicated exposure management, and counterparty risk tracking workflows in Loan IQ.
- **Fee Processing & Settlement:** Gather requirements and validate Loan IQ fee workflows including commitment fees, agency/agent fees, upfront fees, utilisation fees, amendment fees, and waiver fee accrual and settlement processing.
- **Interest Accrual & Rate Management:** Analyse and document rate reset workflows, SOFR/EURIBOR/SONIA transition requirements, base rate and spread configuration, interest period management, and non-accrual processing within Loan IQ.
- **Amendments & Restructuring:** Support BA activities for loan amendment processing — including covenant waivers, facility extensions, repricing events, lender transfers, and syndication restructuring — documenting change impacts on Loan IQ configurations.
- **SWIFT & Payments Integration:** Analyse and document payment processing requirements linking Loan IQ to SWIFT (MT103/MT202), agent notifications, nostro reconciliation, and settlement workflows.

Statutory & Regulatory Reporting — GFRS / LCR / NSFR / COREP / FINREP

- Lead business analysis for ING Bank's statutory and regulatory reporting tribe, covering local and head-office submissions across LCR, NSFR, SiFi3, COREP, FINREP, and Liquidity reporting requirements governed by EBA/ECB regulatory frameworks.
- Manage end-to-end change delivery on GFRS (Global Financial Reporting System) — ING's Oracle-SQL based regulatory reporting platform — analysing how Loan IQ data flows into GFRS and ensuring regulatory calculations and submissions are accurate and complete.
- Perform regression testing every GFRS release cycle, validating regulatory report outputs against expected results and ensuring zero-defect production deployment for mandatory regulatory submissions.
- Conduct root-cause analysis on production regulatory reporting issues, identifying data discrepancies between Loan IQ source data and downstream GFRS reporting outputs, and delivering structured fix recommendations to IT and operations teams.

- Translate complex EBA regulatory framework changes (COREP, FINREP, LCR, NSFR, SiFi3) into detailed functional requirements for GFRS system changes, obtaining stakeholder sign-off and managing change through the full SDLC.

Stakeholder Management & Delivery

- Manage Quarterly Business Review (QBR) sessions with ING business stakeholders, translating lending and regulatory change requests into prioritised delivery roadmaps in collaboration with the Scrum Master and development leads.
- Collaborate with IT architecture, development, and testing teams to ensure Loan IQ and GFRS system changes are correctly designed, tested, and deployed, with full traceability from business requirement to UAT sign-off.
- Provide L3 production support for Loan IQ and GFRS issues, performing in-depth Oracle SQL analysis to identify and resolve data integrity and processing failures.

Collabera Technologies

Feb 2019 – Feb 2020

Client : BNP Paribas India Services Private. Ltd. | Pune, India

IT Lead Business Analyst — Corporate Banking, Trade Finance

Roles and Responsibilities

- Led functional business analysis for Trade Finance transformation initiatives on BNP Paribas IVISION platform, supporting global trade operations and coordinating across APS, Development, SIT, and Release teams for on-time delivery
- Delivered major platform releases and SWIFT upgrade initiatives, ensuring alignment with evolving banking and regulatory standards
- Gathered, analysed, and documented business requirements through BRDs, FRDs, and UAT packs; facilitated sign-off across front office, back office, and technology stakeholders; managed SQL databases across DEV, SIT, UAT, and PROD environments.
- Worked extensively on Trade Finance products, including:
 - Letters of Credit (LC)
 - Bank Guarantees
 - Documentary Credits
 - Collections and SWIFT messaging flows (MT7xx series)
- Collaborated with cross-functional teams (Operations, IT, Testing, Release Management) to deliver end-to-end trade lifecycle enhancements
- Acted as a key liaison between business stakeholders and technology teams, ensuring effective communication and requirement clarity
- Analyzed complex system architecture and data flows, identifying process gaps and recommending solutions for improved operational efficiency
- Supported UAT, SIT, and regression testing cycles, ensuring successful delivery of releases with minimal production defects
- Managed stakeholder expectations through regular updates, prioritization discussions, and participation in Agile ceremonies (Sprint planning, backlog grooming)
- Provided functional training and knowledge transfer sessions to BA teams and end-users on IVISION platform and Trade Finance processes

On Demand Agility Software Private. Ltd. (ODA)

Feb 2018 – Feb 2019

Client : Credit Suisse Services India Private. Ltd. | Pune, India

Lead Business Analyst

Roles and Responsibilities

- Performed functional business analysis on **INSIGHT (Counterparty Credit Risk reporting platform)** to support enterprise-wide risk reporting and regulatory compliance
- Analyzed and resolved **data quality issues** related to credit risk reporting, including **missing sensitivities, incorrect exposures, and data inconsistencies**
- Conducted detailed **data mapping and lineage analysis** across upstream source systems (trade, position, collateral, and market data) to ensure accurate risk aggregation
- Collaborated with **risk, regulatory, and IT teams** to gather and document requirements through **BRD, FRD, and functional specifications**
- Supported **regulatory reporting initiatives** including **CCAR and PRA**, ensuring completeness and accuracy of risk data submissions
- Performed **impact analysis** for data and system changes affecting credit risk calculations and reporting outputs
- Investigated and validated **risk calculation outputs** such as exposure metrics, counterparty aggregation, and sensitivity data
- Led and supported **UAT, SIT, and regression testing**, ensuring alignment between business requirements and system functionality
- Worked on **automation and data processing improvements** using SQL and VBA to enhance reporting efficiency and data quality
- Coordinated with cross-functional teams to resolve **data reconciliation issues** and improve consistency across systems
- Acted as a liaison between **business stakeholders and technology teams**, ensuring clear communication and timely delivery of requirements
- Contributed to improving **data governance, controls, and validation frameworks** within the credit risk reporting environment

AXA Business Services, Pune

Dec 2014 – Dec 2017

Lead Business Analyst — Global Analytics

Roles and Responsibilities

- Led business analysis for portfolio analytics and risk reporting platforms, supporting global asset management operations for AllianceBernstein
- Played a key role in migration from RiskMetrics to MSCI Barra Portfolio Manager, including requirement definition, data validation, reconciliation, and successful UAT sign-off
- Delivered Performance Attribution reporting across Fixed Income and Equity portfolios, analyzing drivers of return including asset allocation, security selection, and market factors
- Produced and validated Market Risk reports, including Value at Risk (VaR), stress testing, and scenario analysis across asset classes such as Bonds, Swaps, MBS, Equities, and Derivatives
- Performed in-depth data analysis and validation using MS SQL to ensure accuracy of portfolio, market, and risk data across multiple systems
- Managed data feeds from external vendors and internal systems, ensuring data integrity and timely availability for risk and performance reporting
- Authored and maintained BRDs, UAT documents, SOPs, and functional specifications, ensuring clarity of requirements and traceability
- Monitored and supported batch processes using Control-M, troubleshooting failures and coordinating with IT teams for issue resolution

- Developed automation solutions using VBA to improve reporting efficiency, reduce manual intervention, and enhance data quality
- Conducted data quality checks and reconciliation across Global Analytics, Risk, and Attribution systems, ensuring consistency in reported outputs
- Collaborated with global stakeholders including portfolio managers, research analysts, and risk teams to address reporting queries and provide analytics insights
- Led and mentored a team of Business Analysts, managing work allocation, delivery timelines, and knowledge transfer initiatives
- Drove process improvement initiatives that enhanced reporting accuracy, reduced manual effort, and improved turnaround time

The Bank of New York Mellon (BNY Mellon) Private Ltd, Pune
Business Data Analyst

Sept 2009 – Dec 2014

Roles and Responsibilities

- Managed **end-to-end data sourcing, transformation, and integration** of portfolio and market data from multiple BNY Mellon investment boutiques into enterprise risk platforms
- Collected and processed data across asset classes including **Equities, Fixed Income, Derivatives, and OTC instruments**, ensuring completeness and accuracy
- Utilized **Informatica ETL** to transform and load large datasets into **MSCI BarraOne** for portfolio risk, performance attribution, and analytics reporting
- Supported risk and analytics functions using **MSCI BarraOne and Barra Aegis**, enabling **Value at Risk (VaR), stress testing, and scenario analysis**
- Performed extensive **data validation, reconciliation, and quality checks**, identifying and resolving discrepancies across multiple systems and data sources
- Leveraged **Bloomberg and FactSet** to source, validate, and enrich market data, reference data, and security-level information
- Designed and maintained **data templates and mapping logic** for efficient onboarding of new asset types and portfolios into risk systems
- Produced and supported daily **risk and performance reports**, including VaR and portfolio analytics for global investment portfolios
- Conducted **root cause analysis of data issues**, collaborating with upstream data providers and IT teams to ensure data integrity
- Prepared **business and functional documentation (BRD, FRD, UAT, impact analysis)** to support data integration and reporting initiatives
- Collaborated with global stakeholders and onshore teams, including participation in **US-based migration and due diligence initiatives**
- Monitored and improved **data quality metrics**, ensuring alignment with enterprise data governance standards

State Street Syntel Private. Ltd.

Sept 2008 – Sept 2009

Associate — Fund Accounting, Asset Servicing (USMF)

- Verified Pre-NAV reports and managed NAV alert escalations to NASDAQ for 23 PIMCO Fund Group funds; performed cash reconciliation, income verification, corporate action processing, and MIS reporting.

KEY ACHIEVEMENTS

- Established as the primary Loan IQ functional SME at ING Bank Netherlands — driving end-to-end BA delivery across Deal Setup, Facility Management, Fee Processing, Loan Pricing/Rollover, Loan Drawdown, SBLC Issuance, Interest & Fees Accrual, Statutory and Regulatory Reporting, and GFRS integration.
- Led portfolio migration from RiskMetrics to Barra Portfolio Manager at AXA Business Services with no SLA breaches or reporting gaps.
- Delivered SWIFT Release 2019 and Major Release 2019 for BNP Paribas IVison Trade Finance platform on schedule, coordinating across 6+ cross-functional teams.
- Designed Market Risk automation solution at Credit Suisse, eliminating manual feed loading effort and improving regulatory data accuracy for CCAR and PRA submissions.
- Represented offshore team in the US on two occasions for BNY Mellon onshore migration — supporting stakeholder alignment and knowledge transfer.
- Scored 91% in NCFM Financial Market Beginners Module, demonstrating strong capital markets foundation.

EDUCATION

Master in Computer Management (MCM) ATSS-ICMR, Chinchwad Pune University	2008
Bachelor of Commerce (B.Com) MUCC, Pimpri Pune University	2006
