

ZIAUR RAHMAN

Full Stack Developer | React.js | Node.js | MongoDB | Microservices | 4 YOE

zrwinmail@gmail.com | +91-7595995257 | Hyderabad, India | LinkedIn: [linkedin.com/in/zrwin](https://www.linkedin.com/in/zrwin) | GitHub: [zrwin](https://github.com/zrwin) | LeetCode: [zrwin](https://leetcode.com/zrwin)

PROFESSIONAL SUMMARY

Full Stack Developer with **4+** years of experience designing and developing scalable web applications, **microservices**, and real-time enterprise platforms using **React.js**, **Node.js**, **JavaScript**, **TypeScript**, **Express.js**, **MongoDB**, and **AWS**. Strong track record of delivering production-ready, business-critical solutions in Agile environments with expertise in **CI/CD**, **Jenkins**, **Kubernetes**, **Argo CD**.

KEY SKILLS

Frontend Technologies: React.js, Next.js, Redux, JavaScript (ES6+), TypeScript, HTML5, CSS3, Tailwind CSS, Shadcn UI

Backend & Architecture: Node.js, Express.js, RESTful APIs, JWT Authentication, Microservices Architecture, System Design

Databases & Tools: MongoDB, SQL, Aggregation Pipelines, Query Optimization, Indexing Strategies

Cloud & DevOps: AWS, Jenkins, Docker, Kubernetes, Argo CD, CI/CD Pipelines, Git, Postman, Jira

PROFESSIONAL EXPERIENCE

Enmovil Solutions | Full Stack Developer | Hyderabad, India | 09/2025 – Present

- Developed and maintained **14+ microservices** modules supporting enterprise GPS tracking, shipment visibility, courier management, and logistics workflow automation, improving system scalability and deployment independence.
- Developed **RESTful APIs** with **Node.js** and **Express.js** and integrated them into **React.js** components, improving data retrieval efficiency and enabling dynamic UI updates.
- Integrated** location and telemetry data from backend **Flask APIs** to provide end-to-end shipment visibility, including key logistics KPIs such as over speeding, night driving, geofence incursions, stoppages, and route deviations.
- Built and enhanced a real-time Shipments Tracking Platform enabling operations teams to monitor and manage **5000+** shipments through interactive dashboards and map-based tracking.
- Optimized MongoDB queries, aggregation pipelines, and indexing strategies, reducing API response times from **20s** to **3s** (~**85%** improvement) and improving dashboard load performance.
- Supported deployment and maintenance of **AWS**-hosted production applications, contributing to release reliability and operational stability.

Sasken Technologies | Software Engineer | Kolkata, India | 09/2022 – 09/2025

- Developed and maintained React.js applications for Caterpillar enterprise platforms including Configuration Management Modules, PLCTQ Dashboard Applications, and CAT Report Generation Systems used by global engineering teams.
- Built reusable React components, custom hooks, and shared UI utilities, reducing duplicate code by approximately **30%** and improving development productivity.
- Implemented **Lazy Loading**, **Code Splitting**, and route-level optimization techniques, reducing initial bundle size by approximately **45%** and improving page load performance by **60–80%** for large dashboard applications.
- Built internal configuration management tools that automated manual engineering processes, improving team productivity by approximately **40%** and reducing configuration creation effort.

TECHNICAL PROJECTS

AI-Powered Resume Builder | React.js, Tailwind CSS, Vercel, Strapi, Gemini AI API

- Developed an interactive resume builder with real-time previews. Integrated **Gemini AI** API to dynamically generate job-specific summaries and tailor professional experience sections based on user input.

Result Management System | Node.js, Express, MongoDB, HTML/CSS/JS, EJS

- Built a full-stack educational portal for efficient data storage and result management, featuring dynamic server-side rendering with EJS templates and a fully responsive user interface.

EDUCATION

Calcutta Institute of Technology | B.Tech in Computer Science Engineering (CSE) | Howrah, India | 2018 – 2022 | 8.85 CGPA

ACHIEVEMENTS & CERTIFICATIONS

- Execution Marble Award for outstanding code quality and execution on the Caterpillar enterprise project.
- Solved **300+** Data Structures and Algorithms problems on LeetCode and GFG.
- Certifications: The Complete 2024 Web Development Bootcamp, The Complete SQL Bootcamp.
