

JAYESH YADAV

Senior Analyst — Hedge Fund Accounting & Portfolio Data Operations

Hyderabad, India | +91-8839814257 | jayeshyadavpimr2022@gmail.com

PROFESSIONAL SUMMARY

Results-driven Senior Fund Accounting & Operations professional with 4+ years of experience supporting global hedge funds across the full trade lifecycle. Managed daily reconciliations across 12+ funds with \$32B combined AUM and played a pivotal role in launching two new funds (\$4B and \$120B AUM) from onboarding through full operational readiness. Deep expertise in Geneva Accounting Engine, multi-asset reconciliations (equities, fixed income, FX, OTC derivatives, futures), NAV finalization, and prime brokerage operations. Experienced in client-facing fund onboarding, data integration into Arcesium systems, and cross-functional collaboration with Legal, Compliance, Product, and Engineering teams. Proven ability to drive process automation using Python, SQL, and Power BI — measurably reducing manual effort and operational risk. Built ETL workflows. Big Four mid- and year-end audit engagements.

Technical Skills: Python | SQL | Power BI | Advanced Excel | Bloomberg (Basic)

PROFESSIONAL EXPERIENCE

Arcesium India Private Limited | Hyderabad | Dec 2022– Present (Client - JP morgan, DE SHAW)

Senior Analyst – Hedge Fund Accounting & Data Operations (FinOps) | Jan 2025 – Present

- Managed daily reconciliations across 12+ funds with \$32B combined AUM covering trade, position, cash, MTM, spot FX, NAV, and prime broker breaks resolving all discrepancies within SLA with zero escalations to senior management.
- Oversaw the complete trade lifecycle across & exposure private equities, fixed income, futures, and FX including booking validation, settlement monitoring on CTM and Traiana and discrepancy resolution.
- Acted as client-facing point of contact for new fund onboarding engagements, coordinating launch readiness, managing data integration into Arcesium's platform, and collaborating with internal teams to ensure seamless go-live across systems, workflows, and reporting.
- Collaborated with Legal and Compliance teams on documentation including security tradeability approvals, corporate actions booking and stakeholder sign-offs within required regulatory and compliance frameworks.
- Partnered with Product and Engineering teams on firm-wide data integration and platform improvement projects, contributing operational expertise to build scalable solutions that reduced manual effort and improved data quality across fund workflows.
- Drove process automation and workflow enhancements using AI tools, Python, SQL, and Power BI, measurably reducing manual effort and operational risk across the team
- Played a key role in launching two new funds (\$4B and \$120B AUM), managing end-to-end onboarding including Geneva configuration, prime broker setup, and full operational readiness.
- Trained junior analysts on reconciliation processes, Accounting workflows, and fund operations standards, supporting onboarding and skill development
- Oversaw monthly investor flow processing (subscriptions and redemptions) across all funds, ensuring accurate NAV impact, timely investor reporting, and adherence to fund documentation.
- Performed pre-upload validation of trade and fund data, validating security attributes, trade details, account mappings and reference data to ensure accurate processing and minimize downstream reconciliation breaks.

- Supported bulk trade/data uploads during new fund onboarding and system implementation, performing data validation, mapping and exception checks to ensure successful integration into the Arcesium platform.
- Investigated and resolved upload-related exceptions and STP breaks, coordinating with Product, Engineering and Operations teams to address data, security setup and workflow issues before downstream processing.
- Validated trade data prior to system processing, ensuring completeness and accuracy of security, quantity, price, currency, settlement and account-level information.
- Managed treasury operations including collateral movements, margin monitoring across OTC derivatives and futures, and wire processing and monitoring zero margin breach incidents.
- Served as primary liaison with Big Four external auditors and third-party administrators; delivered mid-year and year-end audits on time with zero escalations across 2 consecutive audit cycles.
- Built ETL workflows in Python to automate data extraction and transformation across fund systems.

Analyst – Trade Accounting & Data Operations (FinOps) | Dec 2022 – Dec 2024

- Performed daily cash, position, and trade reconciliations across a portfolio of 12+ hedge fund, managing break investigation and counterparty coordination to resolution within T+1 SLAs.
- Established and maintained fund SSIs and SWIFT payment templates, ensuring accurate and secure settlement of fund transfers across counterparties.
- Processed and validated corporate actions lifecycle : dividends, stock splits, mergers, and reorganizations across equity and fixed income holdings.
- Prepared NAV calculations, financial statements, and investor reports for 12+ hedge fund; analysed fund performance and P&L movements to support accurate client deliverables.
- Supported UAT testing, process documentation, and system implementation for new clients and platform enhancements.

Intercontinental Exchange (ICE) / NYSE | Hyderabad | Nov 2021 – Nov 2022

Data Researcher I – Non-NA Region | Nov 2021 – Nov 2022

- Analyzed and validated complex bond structures (convertibles, structured notes, ABS) across non-NA markets for ICE's fixed income data platform, supporting downstream pricing and analytics used by institutional clients.
- Collected and transformed primary market issuance data from legal and financial documents, coordinating with underwriters, issuers, and exchanges to ensure data accuracy and timeliness.
- Resolved client escalations on complex fixed income structures, maintaining high data quality standards and building foundational expertise in fixed income instruments that underpins current derivatives and multi-asset operations work.
