PROFESSIONAL SUMMARY

Senior Full Stack & AI Engineer with 5+ years of experience designing, developing, and deploying scalable SaaS, AI-powered, and enterprise applications using **TypeScript, Node.js, Python, React, Next.js**, FastAPI, Express.js, **AWS, PostgreSQL, MongoDB**, and **Redis**. Experienced in building microservices, REST APIs, event-driven architectures, cloud-native applications, and AI platforms leveraging **LangChain, LangGraph, Retrieval-Augmented Generation (RAG), AI Agents**, and Large Language Models (LLMs). Strong expertise in system design, backend architecture, performance optimization, authentication & authorization, distributed systems, and modern frontend development, with a proven track record of delivering secure, high-performance solutions across healthcare, e-commerce, logistics, and enterprise AI domains..

TECHNICAL SKILLS

- **Languages:** JavaScript, TypeScript, Python, SQL
- **Frontend Development:** React, Next.js, Redux, Redux-Saga, React Query, HTML5, CSS3, Tailwind CSS, MUI, shadcn/ui
- **Backend & Databases:** Node.js, Express.js, FastAPI, Flask, REST APIs, Microservices, JWT Authentication, OAuth2, SQL, MongoDB, Supabase (pgvector)
- **AI Engineering:** LLangChain, LangGraph, Retrieval-Augmented Generation (RAG), Vector Embeddings, Prompt Engineering, AI Agents, LLM Integration
- **Cloud & DevOps:** AWS (EC2, S3, EventBridge, Cognito, Systems Manager, Elastic Beanstalk, CloudWatch, IAM), Docker, GitHub Actions, CI/CD, Vercel
- **Testing & Tools:** Jest, Cypress, Vitest, Playwright, Git, GitHub, Jira
- **Concepts :** System Design, Design Patterns, Distributed Systems, Event-Driven Architecture, Authentication & Authorization, RBAC, Server-Side Rendering (SSR), State Management, Performance Optimization, Scalable Architecture

PROFESSIONAL EXPERIENCE

NEOSOFT PRIVATE LIMITED | *Software Engineer (MERN)* (April 2024 – Present)

Project: Osiro – E-commerce & AI Platform — Germany

- Architected and deployed **8+ stateful AI agent workflows** using LangGraph to automate GTM execution, lead qualification, and sales follow-ups, reducing manual campaign effort by **60%**.
- Designed a production-grade **RAG pipeline** using LangChain and Supabase pgvector, indexing **25,000+ knowledge chunks** and improving AI response relevance while reducing hallucinations.
- Built a scalable **Lerna monorepo** supporting **5+ frontend and backend applications**, enabling shared TypeScript models and reusable business components.
- Developed enterprise dashboards supporting server-side search, filtering, sorting and pagination across 100K+ records, improving usability for sales teams.
- Automated **200+ Playwright end-to-end test cases**, reducing regression testing effort by approximately **70%**.

- Integrated multiple LLM providers including OpenAI and Claude, enabling configurable AI workflows and prompt orchestration across enterprise use cases.

Tech Stack: Next.js, TypeScript, LangChain, LangGraph, RAG, Supabase, Playwright, MUI, Lerna, Vercel

Project: Intelligent Logistics Knowledge Platform — DHL | Team Size: 6

- Designed and developed scalable Python **microservices** using **FastAPI** to build **15+ high-performance REST APIs** for AI-powered document ingestion, semantic search, and enterprise knowledge retrieval.
- Architected and implemented a production-grade Retrieval-Augmented Generation (**RAG**) platform using **LangChain, LangGraph, OpenAI GPT-4, Anthropic Claude, and Pinecone Vector Database**, enabling semantic search across **500K+ enterprise logistics documents**.
- Developed **AI Agent workflows** for intelligent document retrieval, prompt orchestration, and multi-step reasoning, reducing manual document search time by approximately 70%.
- Built asynchronous backend services using Python **asyncio** to process thousands of concurrent AI requests while reducing average API response time by 40%.
- Developed database models using **SQLAlchemy ORM** and managed schema migrations using **Alembic** for PostgreSQL, supporting millions of metadata records for enterprise document management.
- Implemented request validation, response serialization, and configuration management using **Pydantic** to ensure secure and reliable API communication.
- Developed asynchronous background processing services using **Celery** and **Redis** to process 100K+ document indexing and embedding generation jobs.
- Containerized Python microservices using **Docker** and collaborated with DevOps teams to implement CI/CD pipelines for automated deployment across development, staging, and production environments.
- Developed comprehensive unit and integration test suites using **pytest**, improving application reliability, API quality, and deployment stability.

Tech Stack: Python, FastAPI, LangChain, LangGraph, OpenAI SDK, Anthropic SDK, Pydantic, SQLAlchemy, Alembic, asyncio, PostgreSQL (pgvector), Redis, Celery, sentence-transformers, pytest, Docker

Project: SkewB Digital – Ignite Core — UK

- Designed scalable **Node.js** services processing **1M+ SAP work-order records**, ensuring reliable ingestion, validation, and transformation pipelines.
- Built event-driven **AWS** architecture using **S3** and **EventBridge**, reducing file processing latency by approximately **45%**.
- Secured applications by implementing identity management and Role-Based Access Control (RBAC) via **AWS Cognito**.
- Optimized frontend performance using React Query caching and optimistic updates, reducing unnecessary API requests by approximately **40%**.
- Co-led the strategic migration of the user interface from legacy MUI libraries to **shadcn/ui** and **Tailwind CSS**.
- Collaborated with cross-functional teams following **Agile** Scrum methodology, participating in sprint planning, code reviews, and production deployments.

Tech Stack: React, Node.js, TypeScript, AWS (S3, EventBridge, Cognito), SQL, React Query, shadcn/ui, Tailwind CSS

Project: Marlow Navigation – Crew Training Module — Cyprus

- Developed inventory management and training service interfaces utilizing **Next.js** and **MUI** shared component libraries within a **Lerna Monorepo**.

- Built server-side pagination, search, sorting, and filtering supporting datasets containing **50K+ records**.
- Composed rigorous unit tests in **Jest** and component integration testing in **Cypress** to elevate codebase reliability through **150+ unit**.

Tech Stack: Next.js, TypeScript, MUI, Redux, Redux-Saga, Lerna, Cypress, Jest, Vitest

JELLYGIT | Software Developer (MERN) (January 2022 – April 2024)

Project: Health Care Application – Centene — USA | Team Size: 4

- Developed a scalable healthcare backend using **Node.js** and **Express.js**, building **20 + robust RESTful APIs** for patient and medical records.
- Integrated **JWT/OAuth-based** authentication and authorization to strictly secure sensitive health data.
- Built interactive, responsive appointment scheduling and telemedicine consultation components using **React.js**.
- Deployed backend services using **AWS EC2** and **Elastic Beanstalk**; managed configuration secrets securely via **AWS Systems Manager (SSM)**.
- Improved API response times by approximately **35%** using Redis caching and **MongoDB** for high-throughput NoSQL data handling.
- Worked closely with QA and DevOps teams to automate deployments and ensure reliable production releases through CI/CD pipelines.

Tech Stack: React.js, Node.js, Express.js, MongoDB, AWS (EC2, S3, SSM), Redis, REST APIs, OAuth, Tailwind CSS, GitHub

Project: Saudi E-Procure Marketplace — Saudi Arabia | Team Size: 4

- Developed and maintained 8+ independent microservices, including dedicated Authentication, Cart, and User Profile management services.
- Integrated the **Stripe Payment Gateway** to handle secure, seamless online financial transactions.
- Created responsive frontend e-commerce flows using **Next.js**, **TypeScript**, and **Redux** for state optimization.

Tech Stack: Next.js, Node.js, Express.js, TypeScript, SQL, Stripe, JWT, Redux, MUI, Microservices, GitHub

EDUCATION

Birla Institute of Technology, Mesra — B.E. in Civil Engineering | CGPA: 7.91 (2014 – 2018)

Loyola High School, Patna — Class XII (CBSE) | Score: 86.8% (2013)

St. Paul's High School, Patna — Class X (CBSE) | Score: 90.56% (2011)

ACHIEVEMENTS & AWARDS

- **Innovation:** Secured 2nd position in the 'Contraction' event at the annual national technical festival Technika (2016).
- **Designing Skill:** Received the Best Fabrication Award in bridge designing conducted by Civil Simplified (March 2015).
- **Communication Skill:** Secured 3rd position in the National Education Day Debate competition.
