Tools & Methodologies	Jira, Confluence, Oracle SQL, SOAP UI (Basic), SDLC, Waterfall, Agile Methodology, Scrum Framework, Microsoft Excel, Microsoft Office Suite

PROFESSIONAL EXPERIENCE

Assistant Consultant — BA & Scrum Master / QA Specialist

Tata Consultancy Services (TCS) | Hyderabad

May 2022 – Present

- Collaborated with business stakeholders, Product Owners, development teams, and QA to analyse business requirements, clarify healthcare business rules, identify gaps, and support functional solution definition for US Healthcare payer applications.
- Facilitated requirement clarification discussions and cross-functional meetings to ensure requirements were complete, understandable, testable, and aligned with business objectives.
- Supported and coordinated Agile delivery activities, including sprint planning, daily stand-ups, backlog refinement, sprint reviews, and retrospectives, ensuring team alignment on sprint objectives, priorities, dependencies, and delivery commitments.
- Worked with Product Owners and delivery teams to review backlog items, clarify acceptance criteria, identify dependencies, and support readiness of requirements before sprint commitment.
- Tracked sprint progress, delivery risks, open dependencies, blockers, and unresolved issues, escalating impediments to the appropriate stakeholders to support timely resolution.
- Supported UAT, defect triage, release readiness, and production issue resolution by coordinating business and technical teams and validating delivered functionality against agreed requirements.

- Ensured Definition of Done incorporated HIPAA compliance checks, EDI transaction validations, documentation standards, and required functional quality controls for healthcare releases.

Advisory Technical Services Specialist — Healthcare QA & BA Activities

IBM | Hyderabad

Dec 2020 – May 2022

- **Participated in requirements review sessions** for enterprise Healthcare applications, raising queries on business rules related to claims processing and prior authorisation workflows.
- Identified requirement gaps and ambiguities early in the sprint cycle, reducing escaped defects by improving the quality of user stories before development commenced.
- Collaborated directly with business stakeholders and Product Owners to validate understanding of healthcare domain rules — eligibility checks, EOB calculations, EDI transaction formats.
- Supported UAT activities by bridging communication between business users and technical teams, ensuring test scenarios reflected real-world Healthcare payer operations.
- Tracked delivery metrics and produced sprint progress reports for project leadership, supporting data-driven planning decisions.

Test Analyst — Requirements & QA

Infosys | Hyderabad

Nov 2018 – Nov 2020

- Analysed business requirement documents and functional specifications for Healthcare IT platforms, creating detailed test scenarios that validated business rule compliance.
- Actively contributed to backlog refinement and sprint planning, ensuring user stories had clear acceptance criteria before sprint commitment.
- Coordinated across development, QA, and business teams to resolve requirement ambiguities and support predictable, high-quality Healthcare platform releases.

Software Test Analyst

Capgemini | Hyderabad

Jun 2017 – Oct 2018

- Reviewed requirement specifications for Retail Information Exchange (RIX) middleware and translated them into system and integration test scenarios.
- Performed database validation to ensure data integrity across integrated systems matched business-defined rules.

Test Engineer

Infosys | Hyderabad

Sep 2013 – May 2017

- Developed comprehensive test plans and use cases derived from business requirements for large enterprise Healthcare and banking applications.
- Participated in requirement review meetings, raising clarifications that improved specification quality and reduced rework cycles.

KEY PROJECT

NASCO — US Healthcare Payer Platform

Client Location: Atlanta, USA

- Supported business analysis and QA activities for **claims adjudication and prior authorization** systems serving large US Healthcare payers.
- Analysed and validated EDI transaction flows (837 claims, 835 remittances, 270/271 eligibility) against business specifications, identifying processing errors before production release.
- Ensured all deliverables met HIPAA compliance standards — documentation, audit trails, data privacy controls — working closely with compliance and business stakeholders.
- Worked on NPS (mainframe-based claims system) and eFDE web applications, developing deep understanding of end-to-end US Healthcare payer operations.

CERTIFICATION — Certified Scrum Master (CSM) | Scrum Alliance

EDUCATION — Bachelor of Technology (B. Tech) | Biju Patnaik University of Technology (BPUT)
