WORK EXPERIENCE

Infosys Limited

Bangalore, India

Technology Analyst

01/2026 – Present

Senior Systems Engineer

01/2025 – 12/2025

Systems Engineer

03/2022 – 12/2024

- Configured and customized ITSM and CSM modules across multiple business units, streamlining incident, problem, change, and case management processes to improve service delivery consistency.
- Developed and maintained inbound and outbound REST API integrations between ServiceNow and third-party systems, enabling seamless cross-platform data synchronization and reducing manual data entry.
- Built and maintained Transform Maps, Notifications, CMDB configurations, and ACLs to support automated data imports, real-time alerts, and role-based access control.
- Designed and delivered end-to-end Service Catalog solutions for multiple enterprise customers, including catalog items, record producers, and multi-level approval workflows.
- Created a custom Service Portal application with custom widgets enabling real-time ping testing of services directly from the portal interface.
- Implemented Client Scripts, Business Rules, and Script Includes to extend platform functionality, enforce business logic, and improve form usability.
- Led the migration of legacy workflows to Flow Designer, managing analysis, redesign, and delivery to modernize automation and reduce manual process handling.

EDUCATION

Bachelor of Technology in Mechanical Engineering

Maharshi Dayanand University — Haryana, India | 08/2016 – 09/2021
